General and Revenue Secretariat — KB File No. 28

Serial No.	
17	Letter no. 790-242/29-30 dt. 7-3-31 from the pdt., Wdo, Bezwada requesting sanction for increasing the number of the vaccinators from 22 to 23 to cope with the work of vaccination and for reorganising the vaccinators staff.
	The pdt. proposal is not covered by a sanction of the Govt. If necessary, this may have to be called for.
	2) First in this order no. L.4062-3/KB 22-29-22 dt. 6-12-29 sanctioned the continuance of five additional vaccinators in the Bezwada district with a view to cope with the work of vaccination efficiently and adequately, the pdt has now proposed to make the services permanent and to entertain one more vaccinator He has submitted a copy of the D.M.O's letter no. B.655 dt. 28-8-30 urging the necessity for the continuance of the five temporary vaccinators and increasing the number of vaccinators.
2	3). The pdt proposes to reorganise the vaccination staff as follows:

class	existing	proposed
1st class	5	6.
2nd "	5	6
3rd " (permanent)	8	11 permanent
3rd " (Temporary to be made permanent)	5

GENERAL MISCELLANEOUS BRANCH 9 MAR 1931

MYSORE 9 MAR 1931

From

J.V. Karve, Esq., M.B., Ch.B., D.P.H.,
Director of Health in Mysore,
Bangalore.

N. Madhava Rao, Esq., B.A., B.L.,
Chief Secretary to the Government of His
Highness the Maharaja of Mysore, Bangalore.

Sir,

With reference to letter No. F90-242/29-30 dated the 2nd March 1931, from the President, District Board, Bangalore, to your address, requesting sanction of Government to increase the existing number of Vaccinators under the District Board by five, in view of the growing need for vaccination in the District, I have the honour to state that I am in general agreement with the proposals for the revision of the Vaccination Establishment.

2. I doubt, however, if six men in the first class and as many in the second and 11 in the third, would be an equitable distribution compared with the total strength. I would therefore suggest the number in each grade as follows:

4 in the first class

8 in the second class

11 in the third class

This classification may however not be applied in the case of men already in the respective classes when any vacancies occur any arrangement that will be made to fill them up, should fall in with the number fixed in each class, as proposed above

I have the honour to be,
Sir.
Your most obedient servant.

DIRECTOR OF HEALTH.

To

R. Ranga Rao Esqr, B. A., B. L.,
General Secretary to the Government,
B A N G A L O R E.

Through:-

The Deputy Commissioner, Bangalore District.

SIR,

I have the honour to state that Government in their Order No. L. 4062-3 L. B. 22-29-22 dated the 6th December 1929, sanctioned the continuance of four additional vaccinators in the District. Accordingly the services of four additional vaccinators were continued, and the District Medical and Sanitary Officer, in his letter B. 655 dated 28th August 1930 (copy enclosed) has stated his reasons for the extension of their services. He has further suggested that to cope with the work of vaccination efficiently and adequately, the services of another vaccinator is necessary thus bringing the number of Vaccinators in the District to 23 which is the minimum number required in view of the strength of the unprotected children. I am convinced of the necessity of the number, as it is one of the most important duties of the District Board, to check the spread of Small-Pox by carrying on an efficient and effective campaign in Rural parts. With this object in view provision was made in the budget for the current year. It was also pointed out that there was certain amount of stagnation among the vaccinators owing to the number fixed in different grades, which had not been revised for several years inspite of the increase in the total strength. This works a great hardship on the Vaccinators and a great amount of discontentment prevails among them. Accordingly provision was made in the

C2. N. 5124/30-7
Forwarded with Compliments
Deputy Commissioner
Bangalore Dt
8/7/31

the budget to enhance the number in the different scales and thus remove congestion. The following statement indicates the proposed increase.

Class.	Previous.	As re-organised.
1st Class.	5	6
2nd do	5	6
3rd do (Permanent)	8	
do do (Temporary to be made permanent)	4	11 Permanent.
T o t a l.	22	23

As provision has been made in the budget for the re-organisation I request you to be good enough to move Government to accord their sanction for the above proposal.

I have the honour to be,
S i r,
Your most obedient servant,

V. Venkatappa
P r e s i d e n t,
District Board.

Letter No. V. 655 dated 28th August 1930 from the District Medical and Sanitary Officer, Bangalore, to the President District Board, Bangalore.

-:0:-

-:0:-

With reference to you letter No.B.4-41/30-31 dated 20th August 1930, enquiring the necessity of the continuance or the additional vaccinators in the District, I have the honour to state as follows:-

Calculating on the Census figure of 1921, the population of the rural areas of the District during the next ten years will approximately be 9,38,727. Assuming an average birth rate of 35 per thousand the probable number of births per year in the population, under consideration will be about 32,855. Of these 4,928 die before they are 6 months old at the rate of 150 per 1,000 of births. The number of children that survive and come under the operation of vaccination will thus be in round figures 27,000. To this extent primary vaccinations, giving the initial protection against Small-Pox will have to be done annually.

From the official reports for ten years when only 18 Vaccinators were employed including a reserve in the District, the average number of vaccinations performed per year was only 14,857. It will also be observed from the official reports that even in the year during this period when the highest number of vaccinations successfully was performed (1923) the the number was only 21,000. It will be evident from the above that during the time when only 18 vaccinators were entertained the figure was far below the standard figure, even at a time when vaccination figure reached highest. Such poor work recurring year after year lead to the accumulation of the unprotected. If under the circumstances, Small-Pox hangs on all the year round, and now and then break out in an extensive epidemic

means an increase volume of work, hence consequently an enhancement of the number employed from 22 to 23.

MORTALITY FROM SMALL-POX

IN BANGALORE DISTRICT.

Year	Small-Pox
1906	1,094
1909	1,840
1914	1,028
1919	1,563
1924	1,683
1929	1,512
